

Privacy Aluminium Pergola 4m X 3m 3x3 Louvered Roof Bioclimate Room Partition

Our Product Introduction

Basic Information

- Place of Origin: shandong china
- Brand Name: Defender
- Certification: CE ISO/IS90001
- Model Number: Alloy 6063/6061/6005/6060, T5/T6
- Minimum Order Quantity: 5 pieces
- Price: consult
- Packaging Details: Wooden box
- Delivery Time: 2 weeks
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 square meters per week

Product Specification

- Type: Pergola
- Warranty: 10 Years
- Material: Aluminium
- Durable: Yes
- Uv Protection: Yes
- Weather Resistance: Yes
- Easy To Install: Yes
- Versatile: Can Be Used In Various Outdoor Spaces
- Customization Options: Additional Features And Accessories Available
- Waterproof: Yes
- Shade Option: Adjustable Louvers Or Retractable Canopy
- Maintenance: Low Maintenance
- Color: Various Colors Available
- Design: Modern And Sleek

Product Description

Bioclimate 3x4 3x3 Louvered Roof Kit Aluminum Garden Tent Modern Aluminum Canopy

Room partition:

Greenhouse Materials: Greenhouses can be constructed using various materials, each with its unique characteristics and aesthetic appeal. Common materials include wood, such as cedar, redwood, or pressure treated wood, which have a natural and rustic appearance. Metal greenhouses, such as those made of aluminum or steel, have a fashionable and modern appearance. Vinyl or PVC greenhouses are a low maintenance option that is durable, rot resistant, insect resistant, and weather resistant. Choosing the right materials depends on your desired aesthetic, budget, and maintenance preferences.

Specifications:

Green plants and vines: One of the notable features of a greenhouse is its ability to support climbing plants and vines, which can add lush and vibrant elements to the structure. The popular climbing plants on the greenhouse include wisteria, grapevines, climbing roses, jasmine, and honeysuckle. These plants can provide additional shade, privacy, and fragrant flowers, creating a natural and picturesque environment. However, it is important to choose plants that are suitable for your climate and ensure proper maintenance to prevent excessive growth in the greenhouse

Product Name	Aluminium Pergola
brand	Defender
Functional	fire prevention, thermal insulation, moisture prevention, mold prevention, smoke prevention, sound absorption, sound insulation, and waterproofing
Featured	art ceiling, honeycomb ceiling, integrated ceiling, perforated ceiling
The shape of the ceiling tiles is	rectangular
Ceiling ceramic tile type	aluminum pergola
Project solving ability:	graphic design, 3D model design, overall project solution, cross category integration
Applying	hotels, villas, apartments, office buildings, buildings, facilities, supermarkets

Advantages:

Canopy lighting: Lighting plays a crucial role in creating an ideal atmosphere in a greenhouse, especially at night or during gatherings. There are many lighting options to consider, such as string lights, lanterns, spotlights, or embedded lighting. You can install lighting fixtures directly onto the greenhouse structure, or strategically place them on outdoor light poles around the perimeter. In addition, by combining dimmers or intelligent lighting systems, you can adjust brightness and create different atmospheres for different occasions.

A greenhouse with a retractable roof: If you want more flexibility in controlling shadows and sunlight in the greenhouse, you can consider a greenhouse with a retractable roof. This feature allows you to open or close the roof according to your preferences or weather conditions. The retractable roof system can be electric or manual, and there are multiple materials to choose from, such as fabric or louver panels.

Multifunctionality:

The greenhouse serves as the focal point of the garden: The greenhouse can serve as a stunning focal point within the garden or courtyard, creating a sense of destination and visual interest. By strategically placing the greenhouse on a garden path or as an entrance to a specific area, you can guide the exercise process and create charming landscape designs. Incorporating additional landscape elements such as shrubs, flowers, or decorative stones can further enhance the overall beauty of the greenhouse and its surrounding environment.

Canopy kit: If you prefer a simpler and more convenient installation process, you can purchase a greenhouse kit. These kits are equipped with pre cut and pre drilled materials, making assembly of the greenhouse easier. The greenhouse kit typically includes all necessary hardware and instructions, allowing you to build the structure yourself or with the help of a contractor.
