

## Durable and Versatile Aluminum Gazebo / Aluminium Pergola Outdoor Living Area

Our Product Introduction

### Basic Information

- Place of Origin: shandong china
- Brand Name: Defender
- Certification: CE ISO/IS90001
- Model Number: Alloy 6063/6061/6005/6060, T5/T6
- Minimum Order Quantity: 1 pieces
- Price: consult
- Packaging Details: Wooden box
- Delivery Time: 2 weeks
- Payment Terms: L/C, D/A, D/P, T/T
- Supply Ability: 100 square meters per week

### Product Specification

- Type: Pergola
- Warranty: 10 Years
- Material: Aluminium
- Durable: Yes
- Uv Protection: Yes
- Weather Resistance: Yes
- Easy To Install: Yes
- Versatile: Can Be Used In Various Outdoor Spaces
- Customization Options: Additional Features And Accessories Available
- Waterproof: Yes
- Shade Option: Adjustable Louvers Or Retractable Canopy
- Maintenance: Low Maintenance
- Color: Various Colors Available
- Design: Modern And Sleek

## Product Description

### Aluminum outdoor pavilion, pavilion garden building, aluminum greenhouse

Room partition:

**Structure and Materials:** The greenhouse can be constructed using different materials, each with its own advantages and aesthetic appeal. Wood has become a popular choice due to its natural appearance and versatility. Common types of wood used for greenhouses include cedar, redwood, and pressure treated wood. Metal greenhouses, such as those made of aluminum or steel, are known for their durability and modern appearance. Vinyl greenhouses have low maintenance costs and are resistant to decay, insects, and decay.

**Specifications:**

**Design and Style:** There are various designs and styles for the greenhouse to meet different preferences and architectural themes. Traditional greenhouses are usually rectangular or square in shape, with evenly spaced beams and open roofs. Modern greenhouses may have fashionable lines, asymmetrical designs, or unique geometric shapes. Some pergolas incorporate additional elements such as decorative columns, grid panels, or built-in seats to enhance their visual appeal.

Product Name	Aluminium Pergola
brand	Defender
Functional	fire prevention, thermal insulation, moisture prevention, mold prevention, smoke prevention, sound absorption, sound insulation, and waterproofing
Featured	art ceiling, honeycomb ceiling, integrated ceiling, perforated ceiling
The shape of the ceiling tiles is	rectangular
Ceiling ceramic tile type	aluminum pergola
Project solving ability:	graphic design, 3D model design, overall project solution, cross category integration
Applying	hotels, villas, apartments, office buildings, buildings, facilities, supermarkets

**Advantages:**

**Sunshade options:** Although traditional canopies provide partial shading through an open roof design, you can customize the degree of shading by adding various elements. One option is to install a retractable roof or sunshade that can be extended or

retracted as needed. The other option is to use the awning roof made of polycarbonate board or Flat noodles and other materials to provide more shade and avoid the impact of natural factors.

Climbing plants: Greenhouses are usually used as a support for climbing plants, which can add beauty, fragrance, and a sense of privacy. The popular climbing plants on the greenhouse include wisteria, grapevines, climbing roses, honeysuckle, and jasmine. As these plants grow, they can interweave with the structure of the greenhouse, forming a lush green canopy above their heads.

Multifunctionality:

Lighting and accessories: To enhance the atmosphere of the greenhouse, you can use various lighting options. Light strings, lanterns, or embedded lighting can be added to create a comfortable and warm atmosphere for nighttime gatherings. In addition, you can decorate your pergola with curtains or curtains, outdoor furniture, mats, and decorative elements, making it a comfortable and fashionable outdoor living space.

Maintenance: The maintenance required for the greenhouse depends on the materials used. Wooden greenhouses may require regular sealing or dyeing to prevent weathering and extend their lifespan. Metal and vinyl canopies typically require less maintenance and only require occasional cleaning to remove dirt and debris
