

External Sliding Aluminum Garden Gate For Chinese Square Powder Coated Aluminum Outdoor Gates

Our Product Introduction

Basic Information

- Place of Origin: shandong china
- Brand Name: Defender
- Certification: CE ISO/IS90001
- Model Number: Alloy 6063/6061/6005/6060, T5/T6
- Minimum Order Quantity: 1 pieces
- Price: consult
- Packaging Details: Wooden box
- Delivery Time: 2 weeks
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 500

Product Specification

- Type: Gate
- Warranty: 10 Years
- Material: Aluminum
- Easy To Install: Yes
- Versatile: Can Be Used In Various Outdoor Spaces
- Customization Options: Additional Features And Accessories Available
- Waterproof: Yes
- Shade Option: Adjustable Louvers Or Retractable Canopy
- Maintenance: Low
- Color: Customization
- Design: Modern And Sleek
- Size: Standard
- Style: Modern
- Security: High

PRODUCT DESCRIPTION

Aluminum profile door:

1. Corrosion resistant, maintenance free, safe and environmentally friendly

Aluminum alloy has good mechanical properties and corrosion resistance in its natural state, which can fully meet the anti-corrosion control requirements as a material for villa doors and guardrails. One of the reasons why many customers choose courtyard aluminum doors as villa doors is their long lifespan, maintenance free, rust free pollution free, safe, sturdy, and long-lasting durability. The aluminum gate of the courtyard will not be as safe and environmentally friendly as traditional doors made of steel or iron in the past, which can be accidentally touched by people.

2. Good plastic, diverse styles, and scientific structure

The excellent hot extrusion performance of aluminum alloy can manufacture various shapes of complex hollow solid steel according to the requirements of better mechanical structure and appearance technology. It can not only improve the mechanical properties of equal amounts of materials, but also enhance the practicality and decoration of products. We can truly customize according to customer requirements, and there are many styles and colors available for customers to choose from for courtyard aluminum art doors.

3. Lightweight, high strength, adaptable to the times

Aluminum alloy structures have high strength and are less than one-third of the quality of steel, increasing the overall bearing capacity of the building. Combined with various performance advantages such as excellent toughness and weldability.

4. Show soft texture, beautiful colors, personality

The excellent surface treatment possibility, good adhesion fastness, and surface texture of aluminum alloy enable aluminum alloy products to not only choose multiple surface treatment methods, but also be stable and durable, meeting personalized, diverse, and diverse aesthetic requirements. It is a high-quality material for villa doors, cast aluminum doors, and railings.

5. Completely welded, not loose, safe and firm

The entire welding process is applied to the production of door and balcony guardrails, integrating the contact points of the horizontal and vertical bars, loosening the fixed connectors, eliminating potential safety risks, and improving the overall impact capacity of the product.

Place of Origin	Shandong, China
Usage	Garden fence, road fence, farm fence
Type	Driveway Gates
Service	3D modeling, 3D sample models, instruction book, video of installation
Brand Name	Defender Metal
Frame Finishing	Powder Coated
Product name	Aluminum Swing Driveway Gates
Material	Aluminum Alloy
Application	Driveway gate, Garden gate, House gat
Surface treatment	Power Coated
Color	customization
Brand	Defender
Warranty	10 Years
Certification	ISO9001
Package	Pearl cotton protection and put in the wood frame
Port	Qingdao

Advantages:

Reduce swelling and warping: Unlike materials such as wood, aluminum doors do not swell or warp when exposed to moisture or humidity changes. This feature ensures that the door maintains its shape and function over time, thereby reducing the need for maintenance or adjustment.

Integration with security systems: Aluminum profile doors can easily integrate with various security systems to enhance access control and ensure the safety of your property. This may include integrating keyboards, card readers, intercom systems, or closed-circuit television cameras into the door design. The lightweight characteristics of aluminum make it easier to incorporate these additional safety features without affecting the structural integrity of the door.

Sustainability and recyclability: Aluminum has become a highly sustainable material due to its recyclability. When the aluminum

profile door reaches the end of its lifecycle, it can be recycled and used to manufacture new aluminum products without losing its quality. This reduces the impact on the environment and contributes to sustainable resource management.

Multifunctionality:

Low maintenance cost: Compared to other materials such as wood or iron, aluminum doors require the least maintenance. Aluminum does not rust or corrode, so there is no need for regular painting or coating to protect it from natural factors. Regularly cleaning the door with mild soap and water is usually enough to keep it in its optimal condition.

Fire resistance: Aluminum is a non combustible material, which means that aluminum profile doors have excellent fire resistance performance. If a fire occurs, aluminum doors will not promote the spread of flames, making them a safer choice for properties that are concerned about fire safety.

Lightweight and easy to operate: Aluminum doors are lightweight and easy to operate manually or through automated systems. Weight reduction reduces the pressure on door hinges and operating mechanisms, ensuring smooth and easy operation. This is particularly useful for larger doors or individuals who may find it difficult to use heavy-duty manual doors.
