

Security aluminum courtyard gates Anti Theft Villa Front Door T5/T6

Our Product Introduction

Basic Information

- Place of Origin: shandong china
- Brand Name: Defender
- Certification: CE ISO/IS90001
- Model Number: Alloy 6063/6061/6005/6060, T5/T6
- Minimum Order Quantity: 1 pieces
- Price: consult
- Packaging Details: Wooden box
- Delivery Time: 2 weeks
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 500

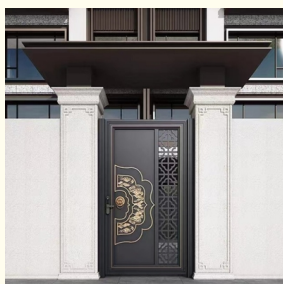

Product Specification

- Type: Gate
- Warranty: 10 Years
- Material: Aluminum
- Weather Resistance: Yes
- Easy To Install: Yes
- Versatile: Can Be Used In Various Outdoor Spaces
- Customization Options: Additional Features And Accessories Available
- Waterproof: Yes
- Shade Option: Adjustable Louvers Or Retractable Canopy
- Maintenance: Low
- Color: Customization
- Design: Modern And Sleek
- Size: Standard
- Style: Modern

Product Description

PRODUCT DESCRIPTION

Aluminum profile door:

1. High cost-effectiveness. Aluminum alloy material itself has anti-corrosion properties, and after surface treatment, it does not fade or peel off paint. Under normal natural conditions, it will not have any problems even after 50 years of exposure to wind, rain, and sun. Its lifespan is particularly long, and overall, the cost-effectiveness is particularly high.
2. Easy to process, aluminum alloy has a lower atomic mass compared to stainless steel, so it can process various styles and complex shapes of aluminum. In addition to spraying process colors, multiple colors can also be selected, which is not easy to fade and provides a high visual effect.
3. There are various styles, and the aluminum gate patterns in the courtyard are all cast, with multiple designs and innovative styles. Compared to doors made of other materials, there are more options to choose from, and they can be combined freely. Each combination is well matched, and the style of the door can also be diverse. Consumers can customize their choices based on their villa style. Courtyard aluminum gate products can meet various customer needs and produce products with different styles. It has a strong metallic texture, soft and beautiful colors, convenient washing, and an elegant, minimalist, and modern style.
4. Widely applicable, the courtyard aluminum art door has good applicability and is suitable for various indoor and outdoor seats, without fading or falling off. The advantages of corrosion resistance, weather resistance, coating adhesion, and material strength are not found in other materials, so they are also the steel with advantages in the application of building decoration steel.

Place of Origin	Shandong, China
Usage	Garden fence, road fence, farm fence
Type	Driveway Gates
Service	3D modeling, 3D sample models, instruction book, video of installation
Brand Name	Defender Metal
Frame Finishing	Powder Coated
Product name	Aluminum Swing Driveway Gates
Material	Aluminum Alloy
Application	Driveway gate, Garden gate, House gat
Surface treatment	Power Coated
Color	customization
Brand	Defender
Warranty	10 Years
Certification	ISO9001
Package	Pearl cotton protection and put in the wood frame
Port	Qingdao

Advantages:

Reduce swelling and warping: Unlike materials such as wood, aluminum doors do not swell or warp when exposed to moisture or humidity changes. This feature ensures that the door maintains its shape and function over time, thereby reducing the need for maintenance or adjustment.

Integration with security systems: Aluminum profile doors can easily integrate with various security systems to enhance access control and ensure the safety of your property. This may include integrating keyboards, card readers, intercom systems, or closed-circuit television cameras into the door design. The lightweight characteristics of aluminum make it easier to incorporate these additional safety features without affecting the structural integrity of the door.

Sustainability and recyclability: Aluminum has become a highly sustainable material due to its recyclability. When the aluminum

profile door reaches the end of its lifecycle, it can be recycled and used to manufacture new aluminum products without losing its quality. This reduces the impact on the environment and contributes to sustainable resource management.

Multifunctionality:

Low maintenance cost: Compared to other materials such as wood or iron, aluminum doors require the least maintenance. Aluminum does not rust or corrode, so there is no need for regular painting or coating to protect it from natural factors. Regularly cleaning the door with mild soap and water is usually enough to keep it in its optimal condition.

Fire resistance: Aluminum is a non combustible material, which means that aluminum profile doors have excellent fire resistance performance. If a fire occurs, aluminum doors will not promote the spread of flames, making them a safer choice for properties that are concerned about fire safety.

Lightweight and easy to operate: Aluminum doors are lightweight and easy to operate manually or through automated systems. Weight reduction reduces the pressure on door hinges and operating mechanisms, ensuring smooth and easy operation. This is particularly useful for larger doors or individuals who may find it difficult to use heavy-duty manual doors.
