

Chinese Square Powder Coated Aluminium Sliding Gates / Black Aluminum Fence Gate

Our Product Introduction

Basic Information

- Place of Origin: shandong china
- Brand Name: Defender
- Certification: CE ISO/IS90001
- Model Number: Alloy 6063/6061/6005/6060, T5/T6
- Minimum Order Quantity: 1 pieces
- Price: consult
- Packaging Details: Wooden box
- Delivery Time: 2 weeks
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 500

Product Specification

- Warranty: 10 Years
- Material: Aluminum
- Weather Resistance: Yes
- Easy To Install: Yes
- Versatile: Can Be Used In Various Outdoor Spaces
- Customization Options: Additional Features And Accessories Available
- Waterproof: Yes
- Shade Option: Adjustable Louvers Or Retractable Canopy
- Maintenance: Low
- Color: Customization
- Design: Modern And Sleek
- Size: Standard
- Style: Modern
- Security: High

Product Description

PRODUCT DESCRIPTION

Aluminum profile door:

Aluminum alloy has excellent hot extrusion performance and can be made into various complex shaped hollow and solid profiles according to the best mechanical structure and appearance process requirements. This not only improves the mechanical properties of equal amounts of materials, but also increases the practicality and decoration of the product. It can be truly customized according to the customer's own needs, and there are many styles and colors available for customers to choose from.

The structural strength of aluminum alloy is high, and it is less than one-third of the mass of steel, which increases the overall load-bearing capacity of the building. Combined with various performance advantages such as good toughness and weldability.

The excellent surface treatability, adhesion fastness, and surface texture of aluminum alloy not only allow aluminum alloy products to have multiple surface treatment options, but also are stable, durable, and make it possible for products to meet personalized, diverse, and different aesthetic needs in terms of color and appearance. It is the best material for villa doors, cast aluminum doors, and railings.

| | |
|-------------------|--|
| Place of Origin | Shandong, China |
| Usage | Garden fence, road fence, farm fence |
| Type | Driveway Gates |
| Service | 3D modeling, 3D sample models, instruction book, video of installation |
| Brand Name | Defender Metal |
| Frame Finishing | Powder Coated |
| Product name | Aluminum Swing Driveway Gates |
| Material | Aluminum Alloy |
| Application | Driveway gate, Garden gate, House gat |
| Surface treatment | Power Coated |
| Color | customization |
| Brand | Defender |
| Warranty | 10 Years |
| Certification | ISO9001 |
| Package | Pearl cotton protection and put in the wood frame |
| Port | Qingdao |

Advantages:

Reduce swelling and warping: Unlike materials such as wood, aluminum doors do not swell or warp when exposed to moisture or humidity changes. This feature ensures that the door maintains its shape and function over time, thereby reducing the need for maintenance or adjustment.

Integration with security systems: Aluminum profile doors can easily integrate with various security systems to enhance access control and ensure the safety of your property. This may include integrating keyboards, card readers, intercom systems, or closed-circuit television cameras into the door design. The lightweight characteristics of aluminum make it easier to incorporate these additional safety features without affecting the structural integrity of the door.

Sustainability and recyclability: Aluminum has become a highly sustainable material due to its recyclability. When the aluminum

profile door reaches the end of its lifecycle, it can be recycled and used to manufacture new aluminum products without losing its quality. This reduces the impact on the environment and contributes to sustainable resource management.

Multifunctionality:

Low maintenance cost: Compared to other materials such as wood or iron, aluminum doors require the least maintenance. Aluminum does not rust or corrode, so there is no need for regular painting or coating to protect it from natural factors. Regularly cleaning the door with mild soap and water is usually enough to keep it in its optimal condition.

Fire resistance: Aluminum is a non combustible material, which means that aluminum profile doors have excellent fire resistance performance. If a fire occurs, aluminum doors will not promote the spread of flames, making them a safer choice for properties that are concerned about fire safety.

Lightweight and easy to operate: Aluminum doors are lightweight and easy to operate manually or through automated systems. Weight reduction reduces the pressure on door hinges and operating mechanisms, ensuring smooth and easy operation. This is particularly useful for larger doors or individuals who may find it difficult to use heavy-duty manual doors.
