Product Description

Product Description:

Our aluminum garden screens are highly versatile and can be used in a variety of outdoor settings. Whether you're looking to create a private area for your garden, hide unsightly equipment or simply add a decorative touch to your pool area, our screens are the perfect solution.

One of the best things about our aluminum garden screens is that they require very little maintenance. Unlike other garden screens that may rust or require painting over time, our screens are designed to withstand the elements and maintain their sleek appearance. This means that you can enjoy the beauty and functionality of our screens without having to worry about upkeep.

At our company, we understand that aesthetics are important when it comes to outdoor design. That's why we offer a wide variety of style and color options to choose from. We work with our customers to ensure that their preferences are matched, and that the overall aesthetics of the screen are in line with the current decoration style of their outdoor space.

So, whether you're looking to add some privacy to your garden or simply want to enhance the beauty of your pool area, our aluminum garden screens are the perfect solution. With their strength, durability, and low maintenance requirements, you can trust that our screens will provide you with the functionality and style that you desire for years to come.

Features:

Product Name: Aluminum Screen

Characteristic: Strong, stylish, durable, corrosion-resistant

Durability: High

Material: Aluminum

Product advantages:

Aluminum alloy has good mechanical and corrosion resistance properties in its natural state, which can fully meet the anti-corrosion control requirements as a material for villa doors and guardrails.

Long lifespan, maintenance free, rust free, safe and stable, and not easy to rust after long-term use.

Aluminum alloy has excellent hot extrusion performance and can be made into various complex shaped hollow and solid profiles according to the best mechanical structure and appearance process requirements.

The structural strength of aluminum alloy is high, and it is less than one-third of the mass of steel, which increases the overall load-bearing capacity of the building.

The excellent surface treatability, adhesion fastness, and surface texture of aluminum alloy not only allow aluminum alloy products to have multiple surface treatment options, but also are stable and durable, making it possible for products to meet personalized, diverse, and different aesthetic needs in terms of color and appearance.

Aesthetics: Style and color are matched according to customer preferences, and aesthetics are in line with the overall decoration style of current customers

Keywords: Aluminum garden screen, aluminum screen extrusions, Outdoor metal aluminum garden screen

Technical Parameters:
